Wrought Iron Door

Parts

ROCKPORT TRADING

Outer frame: 50*100mm, 50*150mm, 60*120mm galvanized square tubing/customized dimension
Door frame: 150*50mm, 120*50mm galvanized square tubing with high temperature/customized dimension

Profile thickness: 2.5/3.0mm

Door sash thickness: 40mm/50mm/65mm (thermal-break door)

Door frame thickness: 25mm/30mm/40mm/50mm/65mm with sealing strips, and the width can be customized according to the wall thickness.

Wrought iron scroll: 14*14mm/16*16mm solid steel/custom size

Grille: 16*16mm/20*10mm solid steel/custom size

Door trim molding: no/ single wrapping

Restricted size: single door sash, width ranging from 650mm to 1200mm, height up to 4500mm.

Frame width ranging from 250mm to 3500mm, height up to 5500mm.

Craftsmanship: customize according to styles

Glass: customizable

Rust prevention process: galvanized tubing with high heat+galvanized iron treatment for wrought iron door pattern decorations

Painting process: fluorocarbon painting series. With 1 layer primer+ high heat galvanized coating+ 2 to 3 layers finish coating

Color: customizable

Lock set: custom

Lock body: mechanical lock body/magnetic lock body/ball catch lock

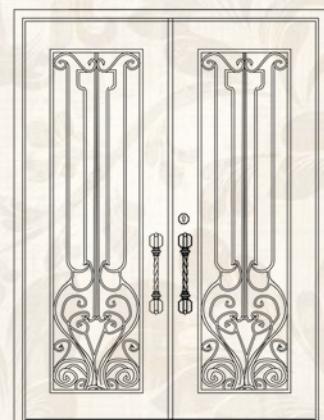

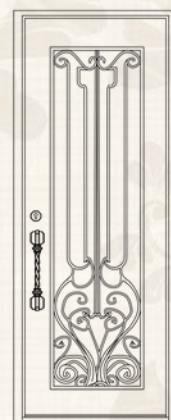

Hinge: wrought iron welded hinge

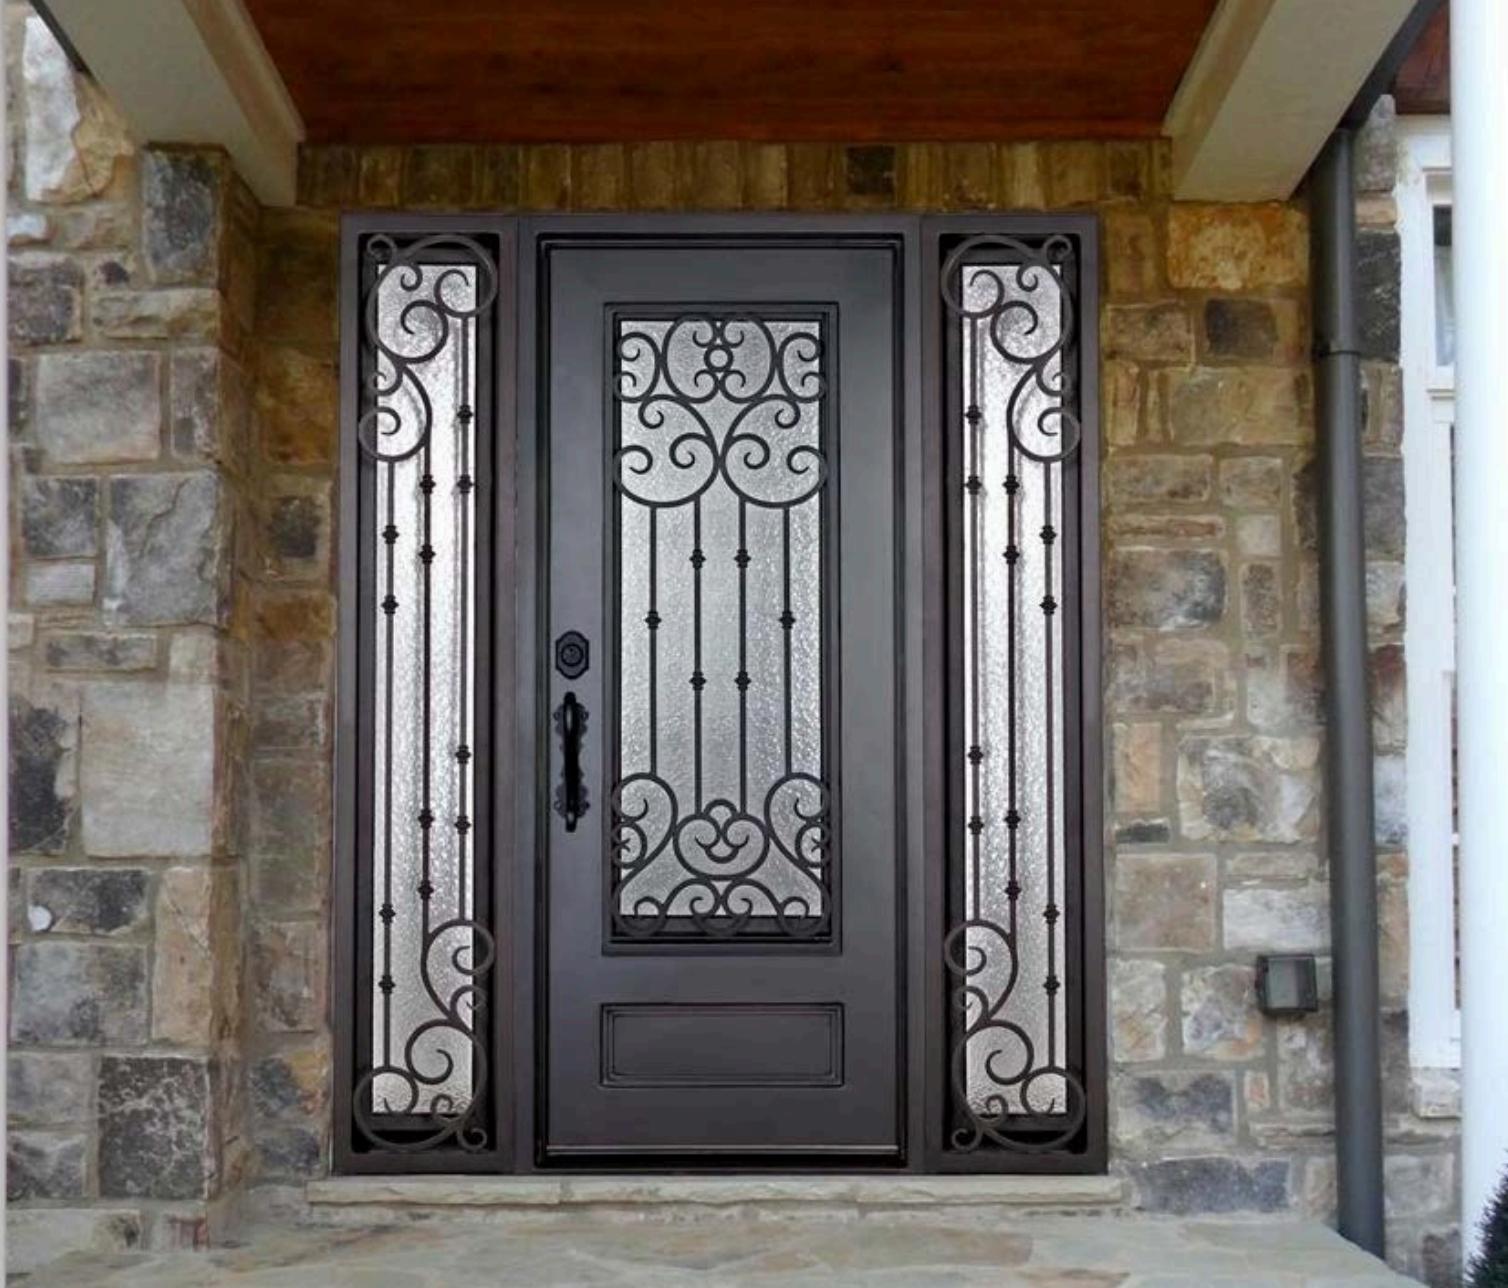

Door threshold: without door sill/ the threshold with seven-character opening inward or outward

Optical hardware/accessories: weatherstrip at the door bottom/ball catch door hardware

Door opening method: open inward/outward

Installation method: expansion screw bolt/welded corner brackets/screws for fixing wooden frame
